FROM TEXAS.

GRAND GULF, (Miss.) July 21.

We learn, generally, that the Mexicans, to the number of 12 or 15 thousand, are on their way to Texas, by land and water. It is stated, on good authority, that the Mexican soldiery are sworn to exterminate all Americans, or never return. The latter we think it most probable that they will do. But this oath speaks very little regard for Santa Anna and his officers in the power of the Texans. We perceive that Gov. Fulton, of Arkansas, has called out a thousand militi), for an object of which we are not yet informed, but, parhaps, contingent. By connected with Texan troubles.

We are informed by a gentleman who left Natchitocherlast Saturd by July 16th, that the tide of emigration towards Texas is immense; the whole country is swarming with men. General Houston has not yet joined the army; and Major General Lamar remains commander in chief.—The tag of war is yet to come, and we anxiously await the result.—Nat Intel.

Manuacar Expressionance of the former in the country is swarming with men.

Manuacz Extracerpinary.—In Georgia, by J. McGehoe, Esq. Mr. David Hodge aged one hundred and two years and two months, to Miss Elizabeth Railey, aged forty years, both of Columbia county, stats of Georgia. Mr. Hodge was at Braddock's defeat and served through the whole of the revolutionary war.

Statue of Washington.—The Pr sident of the New Orleans Exchange Company has been informed by Mr. John Hogan, in a latter from Paris, that he has ordered a copy of Canova's Statue of Washington to be executed in m rble, by a distinguished artist of the name of Rucchis, which he designs as a present to the Exchange Company, to be placed in their rooms at New Orleans.—Buffalo Daily Journal.

The design of the American Class-reader, is to
teach scholars to read. It is not sufficient for this

Mr. Morse:

Sir—Having carafully examined "The American Class-Reader," by George Wilson, I hesitate not to express my opinion decidedly in its favor; because I doem it a work chaste in its selections, classical in point of diction, and admirably calculated to assist youth in becoming correct readers. I hope that it will be universally adopted in our schools.

I have also examined your "Practical and Theoretical Arithmetic," by the same author, containing saveral new methods of operation, and a new system of proportion; and hesitate not to say, that at is the best work I have seen of the kind.

FIRE! FIRE!! FIRE!!—The

Kalamazoo MutualInsurance Compuny, incorporated in 1834, is prepared to execute policies
for any amount, for the purpose of insurance against fire. To that part of the community who
have never witnessed the result of the mutual insurance system, it may be necessary to say, that
where ver it has be neadopted, it has invariebly
succeeded beyond the sanguine anticipations of
its friends. When it is considered that the institution is, in effect, but a voluntary association
of individuals, pl dged to bear each other's losses
in just and equitable proportions—that no combination of wealth or money-making scheme can
possibly influence its operations or divert it from
its lightimate and proper course, a predent and
common foresight will prompt to an immediate
connection with it.

That facilities for becoming members of the
association may be within the reach of every person, agents are or will be appointed in all the
principal towns and villages in the state, to
whom application may be made whenever insurance is required. A prompt and ready attention to duty, on the pirt of agents, will uniformly be expected, as upon this alone depends in a
great degree the prosperity and success of the
company. They are also desired to spread suc
useful and correct information relative to the
nature, prospects and operations of the institution as will promote its interests and give the
public mind a full and correct understanding on
the subject.
